

November 5-9, 2010

Shenzhen, China

Message from the President of WEVA & EVAAP

Ladies and Gentlemen, Friends and Colleagues:

As you may be aware, EVS, the World Electric Vehicles Symposium, is the largest and most influential meeting venue for anyone who is concerned about the development and application of battery, hybrid and fuel cell electric vehicles. In today's world where environment protection and energy conservation are growing concerns priorities, the further and wider use of electric vehicles to achieve zero emission and enhance transportation efficiency has become one of the most discussed emerging global issues. Against such background, "Sustainable Mobility Revolution" has been chosen to be the theme of EVS 25. Participants to EVS 25 will obtain updates of the latest progress of electric vehicles and meet potential business partners from all over the world including those from China. Participants will also be able to explore business opportunities as well as the culture of China – a country of long history, fascinating traditions, yet full of dynamic rhythm and with fastest economic growth.

I am honored and privileged to sincerely invite you to EVS 25 to be held on November 5 -9, 2010 in Shenzhen, China.

Let us foster our friendship and sustain our collaboration for the Mobility Revolution.

Professor C.C. Chan
President, World Electric Vehicle Association,
President, Electric Vehicle Association of Asia Pacific.
Chairman, EVS 25 International Steering Committee.

The 25th World Battery, Hybrid and Fuel Cell Electric Vehicle Symposium & Exhibition (EVS25) will be held on November 5-9, 2010 in Shenzhen, Guangdong, China.

The World Battery, Hybrid and Fuel Cell Electric Vehicle Symposium and Exhibition, EVS in short, is the major most long-lasting symposium event in the electric vehicle history. EVS is the major event of the World Electric Vehicles Association ([WEVA](#)) which has three regional members, namely Electric Vehicle Association of Asia Pacific ([EVAAP](#)), European Association for Battery, Hybrid and Fuel Cell Electric Vehicles ([AVERE](#)) and Electric Drive Transportation Association of Americas ([EDTA](#)). EVS is rotating among Asia Pacific, Americas and Europe hosted by EVAAP, EDTA and AVERE respectively. The 25th Symposium [EVS 25](#) will take place in Shenzhen, China, between 5 and 9 November, 2010.

Today, the EVS series is recognized as the global electric transportation industry's premier and largest forum, showcasing all forms of technologies in the market place and on the drawing boards--from low speed battery electric vehicles to fuel cell electric buses. The event attracts academic, government and industry leaders from around the world who are interested in exploring and understanding the technical, policy and market challenges to a paradigm shift towards the use of electric transportation technologies.

With the theme "Sustainable Mobility Revolution", EVS25 will be an excellent platform to gather the leaders from government, industry and scientific and technological circles as well as from all walks of life. Well-known entrepreneurs, scholars, professors and engineering staff will be able to make exchanges and explore cooperation opportunities on latest technical achievements on electric vehicles. EV future developing direction and strategy, government policies, infrastructure construction, EV commercialization and industrialization, and innovation of high-end industry and leading technologies related will be some of the major topics deliberated.

Electric and new energy vehicles, new battery technologies and various charging infrastructure standards will reach a new milestone in the 21st century's automotive industry development. Such development will have significant and profound contributions to moderating global energy crisis, optimizing environmental protection and realizing sustainable development.

The venue of EVS25 is in Shenzhen, a Chinese special economic zone in Southern China where economic growth is strong and electric vehicles industrial foundations is developing fast. With convenient transportation and well established symposium facilities and venues, Shenzhen also enjoys good subtropical weather in the month of November. With the joint efforts of the organisers and all supporters and sponsors, we trust EVS 25 will be another great success in the EVS series with distinguished achievements in promoting and enhancing "sustainable mobility revolution".

CALL FOR PAPERS

EVS25 is calling for high-quality research papers from academia and industry across all fields relating to battery, hybrid and fuel cell electric vehicles. EVS25 will offer an excellent platform to encourage networking among scientists, engineers and authority representatives, as well as an occasion to assess the contribution of Battery, Hybrid and Fuel cell electric vehicles towards the reduction of emissions and fuel consumption.

General Topics

Vehicles & Transportation Systems
Rechargeable Energy Storage Systems
Fuel Cells
Propulsion Systems & Subsystems
Infrastructure
Energy & Environment
Demonstration & Market Issues
Public Policy
Global Approach
Others

Important Date:

Deadline for Abstract: ~~April 30, 2010~~ May 30, 2010

Notification of Acceptance: June 25, 2010

Deadline for Full Paper: August 10, 2010

For instructions on how to submit an abstract or a paper, please visit our website at www.evs25.org. If you have any question, suggestion or request, please email it to weifeng@evaap.org or weifengces@yahoo.com.cn. We shall respond soonest possible and we shall also try our best to accommodate your needs.

REGISTER NOW!

EVS25, with its theme "Sustainable Mobility Revolution", will serve as the platform to gather leaders from government, industry, scientific and technological circles as well as from all walks of life. Well-known entrepreneurs, scholars, professors and engineering staff will have exchanges and pursue cooperation opportunities on latest technical achievements on electric vehicles, EV future developing direction and strategy, government policies, infrastructure construction, EV commercialization and industrialization, and innovation of high-end industry and related leading technologies.

EXHIBITION, EV PARADE, RIDE & DRIVE

EVS25 will facilitate the largest scale of 30,000 sq.m. **Exhibition** floor in EVS history. The expected number of visitors will also be the largest ever, including several thousands registered participants and tens of thousands of visitors. To exhibit your company's products or services or discoveries to the world electric vehicle industry, please register as soon as possible.

EVS25 will also organize an **EV Parade** and it will be an excellent platform and opportunity for participants to present their latest development of battery, hybrid and fuel cell electric vehicles to the public. If you are interested in the Parade, please contact EVS25 secretariat soonest.

Seeing is believing, EVS25's **Ride & Drive** program welcomes EV producers to bring along your EVs for EVS25 visitors to have an driving experience of electric vehicles. Please also contact EVS25 secretariat if you are interested.

SPONSORSHIP

EVS25 welcomes sponsorship.

Various Packages of Sponsorship will be supplied if you are interested. If you wish to publicize the activities of your company or simply introduce your company to a broad spectrum of visitors to EVS25, please contact: weifeng@evaap.org ; weifengces@yahoo.com.cn for the sponsorship packages.

We look forward to seeing you in EVS25 in November, 2010 in Shenzhen, China.

Wei Feng, Secretary-general

Electric Vehicle Association of Asia and Pacific

c/o, China Electrotechnical Society
